

UNITED REPUBLIC OF TANZANIA
PRESIDENT'S OFFICE
REGIONAL ADMINISTRATIVE AND LOCAL GOVERNMENT
CHEMBA DISTRICT COUNCIL

Source: Mohamed Semdoe-District Environmental Management Officer-Chemba District Council, December, 2022.

Chemba District is located in a semi-arid region where a range of rain falls between 400 and 700mm annually. It experiences unpredictable rainfalls which lead to adverse impacts on social and economic activities, particularly in the agriculture and livestock sectors.

The council has established rainfall starting trend databases at its locality through observation so as to help the local community in planning a season calendar specifically for farmers, pastoralists and beekeepers who are major users of this useful information, so as to attain sustainability.
